This book is a pizza. Just as pizza is a perfect food, this is a perfect book about pizza. The intelligent reader may never use a recipe from this book; that's because it's a book of ideas. The "perfect pizza" is one you create, and the great strength of this book is ideas for crusts and toppings. Cinn-O-Bun pizza? Kung Pao Cashew pizza? Yukon Gold? Lucy in the Sky with Pizza? Chicken, chutney or chocolate? Fire roasted veggies are one thing; but, what about asparagus? How about blistered corn? Or Blueberries and raspberries with honey? This book brims with ideas. Beginners get a clear introduction in creating and grilling a great crust. Remember, the crust is not just a chunk of dough rolled flat. It is also a work of art. Start with basics, which are well explained; then, your toppings become the genius of your great pizza. The recipes are wonderful, varied, inspired and interesting. But it's my contention "the perfect pizza" is a delight to your personal taste -- not mine or anyone else. Your taste buds will tire of monotony unless you try variety. Broccoli? Would that work? These recipes will spark the imagination with plenty of "Hey! I never thought of that ... I wonder what it will taste like with a little ....." Remember, pizza is not a burger. Mickey D created the world's most beloved hamburger by adding four slices of pickle. That's all it took. There's no way to create an "enduring pizza" by a similar simple trick. Every one is a signature of its maker. I've been making pizzas for 40 years, and I wish I'd come up with at least some of these ideas. Had I done so, I'd probably be writing books instead of book reviews.

One word... NO!!! OUTSTANDING book...outstanding pizza! Lots of pictures to go with most of the recipes which, I'm not going to lie, is usually what makes me want to try something out. The pictures look great and the pizza is equally as good. Couple of things... and maybe I'm just not as astute as a couple of the other reviewers, but for one... the indirect heating thing although it sounds sexy didn't work for me. Not even close. The side of the pizza closest to the heat was somewhat cooked while the side away from the heat WAS drooping down between the grating. For what it's worth, I have an "H" burner in my grill, not that I think that it would make all that much of a difference. I usually turn both sides on HIGH for the first 2 to 3 minutes until the dough is starting to firm up and get a couple of nice grill marks on it and then turn it to LOW on both sides until it is ready to be flipped. Secondly...before you attempt to make any of the pizzas in the book... pizza...peel. ABSOLUTELY essential. [...] (best price / quality that I could find and at my house in < 48 hrs). The first couple that I tried were with a cutting board, multiple spatulas, and even with a 2 or 3 person

effort was nothing less than a mess. Save yourself the effort. It's worth the \$15. I use the whole dough ball from the dough recipe in the back of the book and spread it out relatively thin which covers most of the grate. That's usually enough pizza to serve about 4 people based on today's standard American diet. The only downside to these pizzas... and this is minimal as it's worth the effort overall... if you follow all of their recipes / ingredients the pizzas can be relatively time consuming.
