# Estimating With Excel: Unlocking The Power For Home Builders, 2nd Edition

## Synopsis

If you want a simple, step-by-step guide to improve the accuracy and speed of building estimates, *Estimating with Microsoft Excel* was written for you. Author Jay Christofferson, a recognized expert in computerized estimating, teaches you how to build a fully customized estimating program that addresses your specific estimating needs. Create estimates that are powerful and reliable enough for your most important management decisions. Loaded with detailed instructions—from programming basic formulas to automating Excel to integrate with other software packages; *Estimating with Microsoft Excel* will show you how to set up an accurate, efficient estimating system. Examples from the text, templates you can use to set up your estimating system, and a demo of EstimatorPRO are included on the CD.

## Customer Reviews

This is a great book. My company is still using Office 2003. It is small and easy to use.

This book focuses a lot on how to use excel than estimating building costs. It would be useful for those who want to learn excel for the first time and not those who want to build a home. I was not able to get any value from it to estimate building costs my new home.

tough read

good

Good information. Very similar to how we do estimating now. This makes estimating more efficient and sets up.
