Customer Reviews

For this subject, it's hard to imagine that there would be a good study aid on the market, but that's exactly what these flash cards are. These cards are so good because they hold all of the information you need to know for the test. If you studied without these cards you would probably do one of two things. One, you would waste a lot of time studying things that won't be on the test or two, you would study all the wrong things and still do poorly on the test even though you thought you worked hard. With these cards, you don't have to worry about either of those things. Everything on the cards will be covered on the test. You'll study the right thing and with the help of the great cards, you'll know what you need to know.

There's really no better way to study your notes than through rote drill. So save yourself the time and headache of making your own cards. Just get this system! It's totally worth it.

There are a ton of flashcards in the system and they really cover all areas that you should be familiar with in order to be exam ready. The cards are sturdy and well made and you can take them anywhere, which makes studying a lot more convenient. Now there's no more excuses to not be studying! In fact, using these cards almost makes studying fun. You can use them on your own to quiz your knowledge and they work great in study groups too. One of the things that's so nice about these flashcards is that you get just enough information on each card. The formatting is attractive and not too wordy. You get just enough on the front and then full explanations on the back. It's so thorough and comprehensive and extremely time saving. If you're kind of a last minute studier or someone who's always on the go, then this system is going to save you a lot of time and energy. You're able to pack the most into your study sessions and really be prepared for the exam. Don't even bother with anything

else—these flashcards are awesome!

There is a time to study and this flashcard system makes study time to the point and profound. There is so much to remember for this exam. However, this system leaves nothing to the imagination. It includes a balanced array of testing objectives.

I didn't buy it from because I had the chance to get a used copy at half the price. I feel these flashcards are well put together. I'm glad I could put them to good use. I will definitely recommend this to others. Obviously, the flashcards alone simply cannot be enough to pass the Foreign Service Officer Test, unless you are already very knowledgeable about the topics in the test. Therefore, I recommend test-takers to get a study guide as well as other books which will have more information that you will need on the test. A flashcards is a tough system to pull for such a difficult and all-encompassing test, but Mometrix seems to have found a way to deliver the information we need.

I shared a copy of this flashcard set along with the study guide the company also sells. I noticed some people dislike not having shorter answers on the flashcards. Most people learn well with flashcards and spaced repetition if used properly. Maybe it doesn't work the same way for everyone, but for me, regardless of how long or short the answer, my mind automatically scans the information and notates the important phrases and details, as if highlighting them for quicker recall later. The more I repeat the information, the quicker the recall and eventually I have truly learned the information. There is a lot of information, so these cards aren't a quick cheat scheme like lots of study guides, but I'd rather have more info than less. It is a down to earth, honest system which requires you to put in effort to learn, but you will learn quickly if you're doing it repetitively. You will not be learning one and two word answers to have on hand just for the test which you've memorized by rote; rather you will have LEARNED and RETAINED information, which you recall when you need it. The flashcards are created to go with the book as a system, though I imagine you could use them independently just fine. For me, the more review and the more questions put forth in different ways, the better. Some who are very academically practiced and in a college atmosphere recently may pass the exam easily without much study, but not everyone is like that. Personally I needed the practice and review because I'm not in an academic atmosphere. I don't feel confident that I would have scored well without the study guides.

After struggling for years with my ability to study for tests and only being able to barely scrape by, I

was happy to find the FSOT Flashcard Study System. I liked how the system uses repetition and I found that by using the flashcards I was really retaining the information and found this method to be much easier than any other I had tried. I highly recommend this study system and love how it covers such a large variety of subjects and how well it prepares you.

I bought these flashcards about a month prior to the test. They worked wonderfully if you need a background in the several topics the FSOT covers. The only negative aspect about these cards is that I wish they would have made it known that the flashcards are written in an open-ended question style even though the questions seem straight forward.

The material will pop right off the flashcards and into your brain. Take advantage of this system because it will help you to foster the knack for understanding and retaining study material. There are enough cards to go around and the set does not lack testing material at all.
